[This important article was originally posted on GR in October 2022.]

As boosters that have not been tested on humans are being rolled out across the country, a new study indicates that the jab is far more dangerous than COVID-19 itself. And the CDC has provided false information regarding their tracking of adverse events linked to the vaccines.

As government officials and mainstream media urges the vaccinated to inject a second so-called “bivalent” booster said to be targeting the Omicron variant, it turns out that this substance hasn’t been tested on humans. And the only animal trial that has been performed included [eight mice](#).

“It hasn’t been proven in a clinical trial, because we don’t have time to do a clinical trial because we need to get the vaccine out now because we have such a situation throughout the world and certainly in the United States, we’re having 400 deaths per day and up to 5,000 hospitalizations a day,” NIAID Dr Anthony Fauci explained in an [interview](#).

CDC Director Rochelle Walensky has also stated that the boosters must be expedited in order to work properly. A delay would potentially render the shots “outdated” as new variants would form, Walensky [argues](#).

Study: Worse than the Virus

A new [study](#) conducted by scientists from Harvard and Johns Hopkins, currently in pre-print, reveals that the COVID-19 vaccines were up to 98 times worse than the virus itself. The study is critical of the booster requirement for American university students, stating in the abstract: “Using CDC and sponsor-reported adverse event data, we find that booster mandates may cause a net expected harm: per COVID-19 hospitalisation prevented in

previously uninfected young adults, we anticipate 18 to 98 serious adverse events, including 1.7 to 3.0 booster-associated myocarditis cases in males, and 1,373 to 3,234 cases of grade ≥ 3 reactogenicity which interferes with daily activities.”

False Information

As first [reported](#) in the Epoch Times, CDC has provided false information regarding their tracking of adverse events caused by the vaccines. At the same time, Walensky admits that there is a causal relationship between the mRNA vaccines and myocarditis:

In a [letter](#) dated September 2 from CDC Director Rochelle Walensky to Senator Ron Johnson, the director states that “CDC consistently performs extensive data collection and analysis to detect potential adverse events and safety signals and then communicates this information to the public. For example, VAERS staff conducted assessments showing that causal associations exist between thrombosis with thrombocytopenia syndrome and Janssen’s COVID-19 vaccine and between myocarditis and mRNA COVID-19 vaccination.”

In the same letter, Walensky also stated that the CDC did not analyze certain types of adverse event reports whatsoever in 2021, despite having previously stated that they did start this tracking in February of that year.

The Worldwide Corona Crisis, Global Coup d'Etat Against Humanity

by Michel Chossudovsky

Michel Chossudovsky reviews in detail how this insidious project “destroys people’s lives”. He provides a comprehensive analysis of everything you need to know about the “pandemic” — from the medical dimensions to the economic and social repercussions, political underpinnings, and mental and psychological impacts.

“My objective as an author is to inform people worldwide and refute the official narrative which has been used as a justification to destabilize the economic and social fabric of entire countries, followed by the imposition of the “deadly” COVID-19 “vaccine”. This crisis affects humanity in its entirety: almost 8 billion people. We stand in solidarity with our fellow human beings and our children worldwide. Truth is a powerful instrument.”

Reviews

This is an in-depth resource of great interest if it is the wider perspective you are motivated to understand a little better, the author is very knowledgeable about geopolitics and this comes out the way Covid is contextualized. —Dr. Mike Yeadon

In a world of crisis humanity in which we find ourselves, in this singular, irregular and massive assault against liberty and the goodness of people, Chossudovsky’s book is a rock upon which to sustain our fight. —Dr. Emanuel Garcia

In fifteen concise science-based chapters, Michel traces the false covid pandemic, explaining how a PCR test, producing up to 97% proven false positives, combined with a relentless 24/7 fear campaign, was able to create a worldwide panic-laden “plandemic”; that this plandemic would never have been possible without the infamous DNA-modifying Polymerase Chain Reaction test – which to this day is being pushed on a majority of innocent people who have no clue. His conclusions are evidenced by renown scientists. —Peter Koenig

Professor Chossudovsky exposes the truth that “there is no causal relationship between the virus and economic variables.” In other words, it was not COVID-19 but, rather, the deliberate implementation of the illogical, scientifically baseless lockdowns that caused the shutdown of the global economy. —David Skripac

A reading of Chossudovsky’s book provides a comprehensive lesson in how there is a global coup d’état under way called “The Great Reset” that if not resisted and defeated by freedom

loving people everywhere will result in a dystopian future not yet imagined. Pass on this free gift from Professor Chossudovsky before it's too late. You will not find so much valuable information and analysis in one place. -Edward Curtin
